

Surgeon Scrub Sinks

Reliable hands-free surgeon scrub sinks for healthcare facilities.

The Sani-Lav S800 Series Surgeon Scrub Sinks are designed for healthcare environments where sanitation, durability, and reliability are essential. Constructed from seamless welded stainless steel, these sinks deliver long service life while supporting hands-free operation that helps reduce cross-contamination and improve infection control. A removable front service panel provides convenient access for installation and maintenance.

Why choose our surgeon scrub sinks

- Trusted manufacturer of stainless steel washdown and sanitation equipment
- Proven reliability in food processing and healthcare environments
- Durable stainless steel construction built for long service life
- Hands-free operation that supports modern infection control programs

Surgeon Scrub Sinks
